**End of Year Report for FY17
July 1, 2016 – June 30, 2017**

**Submitted by:
Brian Wilm
INHS/IDOT Wetlands Program Leader
and Principal Investigator**

September, 2017

Introduction

As specified in the budget proposal submitted for this grant by the University of Illinois to the Illinois Department of Transportation, the purpose of this report is to document work efforts in FY17 as compared to the budget proposal. Specific topics addressed here include: projects and deliverables, staffing, equipment, professional development and research, and financial.

Projects and Deliverables

Projects tasked and reports submitted in FY17 are summarized in Table 1 below. Submitted project reports include some tasked in FY16, but with due dates in FY17. Similarly, some projects tasked in FY17 have due dates in FY18. Tasked projects reported here include ongoing multi-year monitoring projects (which require yearly reports), although they are not technically tasked each year. Wetland surveys (wetland delineations) dominated the number of project reports submitted and tasked, as is the case in every year. Reports submitted in FY17 included work completed in 52 Illinois counties (Figure 1); the six county Chicago area (Cook, Kane, McHenry, DuPage, Lake, Will) accounted for 29 projects submitted, 27.4% of all projects. Summary information for all reports submitted in FY17 is presented in Appendix A and a full citation list is included in Appendix B.

Staffing

Staffing as proposed FY17 is shown below in Table 2. Several changes occurred within the fiscal year. Ed Heske retired at the end of 2016; Brian Wilm immediately assumed all of his duties on this contract and he will do so moving forward. Diane Szafoni retired in May 2017; Tari Tweddale assumed her duties beginning of FY 18. Kimberly Kessinger (a Surveys Coordinator in Springfield) was moved to this contract from the INHS/IDOT Statewide Biological Survey and Assessment Program contract on February 16 and remained on this contract for the rest of the fiscal year. Kimberly works to support both contracts and the move was made for financial reasons within the Biological Survey and Assessment Program. Two hourly workers (Christine Cline and Ross Ziobro) were paid less than \$2500 to provide herbarium collection support for botanists on this contract.
